

Product Information

# MPDmanager 2016™

## Simplifying the management of IDMP and other medicinal product information

With the imminent introduction of the new IDMP standards, organizations will need to capture and manage significantly more regulatory data for each medicinal product than under the existing XEVMPD requirements. Data management for multiple medicinal products registered in numerous different regions involves significant effort, it can be a time consuming and costly process.

### Benefits

- Increased transparency and productivity via user friendly interface
- Global IDMP and CFR Part 11 compliance
- Multiple internal and external users can maintain the medicinal products
- Assure data quality via business validation, technical validation, four-eye principle and electronic signature
- Product Dictionary functions as your single source of truth for all your Medicinal Products
- Supporting the shift towards future demands like multi-gateway functionality and data model changes
- Integration with EXTEDOsuite and other third party products to provide a total RIMS solution
- Reuse your data from source systems to improve data quality and save time
- Full system validation support reduces validation effort to a minimum
- Well established in Operation Management services, which takes over IT Infrastructure Services, Application Management Services including maintenance of Controlled Vocabularies, pre-validated software releases and video tutorials on new features

Editing of a Medicinal Product

EXTEDO's MPDmanager 2016 simplifies the process of maintaining IDMP submissions, delivering a single source of truth for all IDMP data. By providing a repository for all registrations and enabling the electronic submission of data directly to the authorities, MPDmanager's powerful medicinal product database enables you to efficiently fulfill regulatory requirements surrounding the management of product data.

## Simplifying IDMP registration maintenance

Through its clear and concise user interface MPDmanager enables your team to maintain, analyse, validate and create your medicinal product data. Data records are presented in the common SmPC structure that is familiar to every regulatory manager, and updates can be made to individual or multiple data records at the same time. When you are ready to submit an update, MPDmanager's built-in validation engine provides a quick and easy quality check to ensure all changes remain compliant with ISO and other regional specifications.

## MPDmanager is the perfect solution for any company size

### Standalone solution – for CROs, small to mid-sized corporations

As a standalone tool MPDmanager provides simple IDMP compliance for CROs and small to mid-sized corporations. Out-of-the-box, its capabilities

## Functional Overview

- › Dictionary holds all your medicinal products. Maintenance activities can be executed for one or multiple medicinal products at the same time
- › Maintain the life-cycle of Medicinal Products via regulatory activity and track the changes
- › Full multi-gateway functionality with automated communication between industry and authority
- › Dashboard that allows users to customize the most essential information that is needed to maintain Medicinal Products on a daily basis
- › Identify Medicinal Product by message and data record life-cycle states
- › Quick and advanced search to find data records quickly and efficiently
- › View your IDMP data in a SmPC like structure
- › Product Core Data, a single source to reduce data redundancy and to quickly update multiple medicinal products in one go. Automated data pull from MedDRA, Snomed /GInAS, EMA and other sources managed by EXTEDO
- › Connect a single source system, RImanager or MDM (Master Data Management)
- › Web based, deployed as SaaS (subscription) and In-House (license)
- › Validation Documentation Package
- › Protection of intellectual property via user and rights administration
- › External security and privacy audits including penetration tests

enable you to efficiently submit and manage IDMP registrations with the EMA and other regional authorities. While its easy-to-use interface allows you to browse data without requiring a detailed knowledge of the IDMP data model. Additionally, innovative dashboards and notifications provide you with up-to-date information about the status of your registrations. MPDmanager also enables you to query live data through quick search and advanced search, allowing your users to manage their medicinal products efficiently.

### Integrated RIM and MDM – for medium to large-sized corporations

For larger corporations, MPDmanager 2016 can be implemented as part of an integrated Regulatory Information Management solution. Full multi-gateway functionality and automated communication between industry and authorities is supported, and its plugin architecture enables you to connect to tools such as EXTEDO's RImanager or Master Data Management (MDM) systems. This approach means that data does not need to be re-entered, improving data quality and saving time.

### Simplifying the move from XEVMPD to IDMP

MPDmanager 2016 is your perfect companion for handling the transition from XEVMPD to IDMP. The ability to access to submission data without requiring a comprehensive understanding of every detail makes your transition smoother and ensures that your business continues to remain compliant into the future.

EXTEDO MPDmanager 2016 provides Effortless Compliance™ with IDMP medicinal product data management regulations. It improves your data quality, increases operational efficiency, and delivers better-automated communication channels between your departments and with the authorities.

## Available Modules

### Report Module

Configurable map and charts showing Medicinal Products with authorization status. 3<sup>rd</sup> party application for custom specific reports.

### National Authority Gateway Module

Send messages to other national HL7 authorities once the respective Implementation Guides become available.

### MPDconnect

Connect your source system to MPDmanager. MPDconnect is a state of the art standardized interface giving full access to the MPDmanager 2016 functionality and supports a 2-way communication with any source system. Available with SaaS, extended SaaS and in-house solutions.
