EXTEDO

Quality Management Hub powered by CARA

Effortless Compliance and Efficiency with EXTEDO's Quality Management Hub powered by CARA

Managing a strong Quality Management Solution (QMS) is essential for life sciences organizations to stay compliant and ensure patient safety. With data often scattered across different departments, maintaining effective quality control can be challenging. EXTEDO's Quality Management Solution powered by CARA helps you handle quality tasks and meet regulatory requirements with ease. By streamlining processes, it boosts efficiency, ensures product integrity, and keeps you competitive in a demanding market.

Life sciences companies face tough challenges, from meeting strict regulations to ensuring product safety. EXTEDO's QMS powered by CARA addresses these issues by helping you stay compliant with evolving requirements, manage risks, and maintain operational excellence. It simplifies supplier oversight, improves data (re-)use, and streamlines the processing of SOPs, training, audits, and corrective actions, ensuring smooth operations and regulatory success.

Quality tools for QA excellence

- Streamline audits with comprehensive tracking and scheduling.
- Identify, evaluate, and mitigate risks effectively.
- Resolve issues with corrective and preventive actions.
- Manage changes efficiently to maintain compliance.
- Manage your equipment throughout the whole lifecycle.

EXTEDO's Quality Management Hub provides end-to-end control over all kinds of quality processes, helping you streamline audits, track and reduce risks, and ensure ongoing adherence through automated CAPA workflows. With tools to manage changes, oversee equipment throughout its lifecycle, and extend compliance oversight to your suppliers, you gain complete visibility and accountability

Benefits

Automated Workflow Efficiency

- Speed up your quality processes with automated workflows for periodic reviews, assessments, and approvals, coupled with real-time alerts to boost efficiency and responsiveness.

Quality Event and Document Management

- Streamline the management of quality events such as CAPA, audits, and change control, along with controlled document handling, including default printing options.

Advanced Evaluation Tools

- Provide your team with detailed effectiveness evaluations to consistently improve quality outcomes and ensure compliance.

Effortless Data Integration and Reporting

- Utilize comprehensive dashboards for reporting and benefit from EXTEDOpulse' Master Data Management, facilitating easier data management and decision-making.

across your operations, supporting a continuous state of audit readiness and long-term quality improvement.

SOP and Training Management

- Standardize procedures and keep staff up to date with automated training courses.
- Automate and control document workflows and printing processes.
- Utilize data analytics to drive quality improvements.

The solution's Process Optimization features help you standardize procedures, automate training, and drive continuous improvement across your operations. Keep staff aligned and compliant with automated training assignments linked to up-to-date SOPs, while streamlined document workflows and controlled printing processes ensure consistency and efficiency. Built-in analytics turn operational data into actionable insights, enabling you to monitor performance trends and implement quality improvements with confidence.
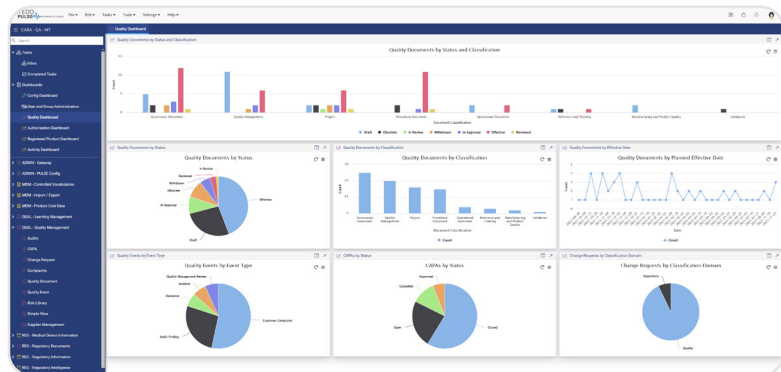

System Integration and Reporting

With EXTEDO's Quality Management Hub your organization benefits from comprehensive integration capabilities that ensure the

solution works in harmony with existing data management platforms. Information flows smoothly along the specified paths and silos are eliminated. Powerful analytics and reporting tools transform raw data into strategic insights, supporting informed decision-making and continuous improvement of quality processes. Thanks to integrated workflows the quick identification of up-to-date data is significantly facilitated while consistent operations maintain continuous compliance. The solution contributes to your organization's audit-readiness at any point in time, providing valuable support working toward your goal of Effortless Compliance.
